Experience LinkedIn Lead Generation like never before

225,000,000+ LinkedIn Members

Most of our Clients open up several synergistic business dialogues, and achieve 20-30 warm leads and 3-12 meeting requests from a single campaign.

Our Objectives:

- Make you overwhelmed with the response at the end of each campaign
- Build warm rapport and create buy in with senior level decision makers and your ideal customers
- Bring traffic to your profile
- Increase online presence, credibility and sound reputation
- Approach each campaign holistically- do everything we can to maximize your conversion rates

Why Use LinkedIn?

LinkedIn is one of very few methods that **allows you to reach senior level people!**

LinkedIn is rich with high value, senior level contacts - they are quality business people, decision makers, who typically have budget signoff and are worthy of your time to open up a business dialogue. Don't waste time talking to people without authority. Very few others methods guarantee you such a direct route to these senior level prospects. Most of our clients are astounded that such senior people will readily accept their invites.

Besides senior level people you can target basically whoever you like be it an IT director at a software company, Marketing Directors in Advertising you name it and we target them for you

- Unlike many other marketing methods, **LinkedIn is laser targeted and you reach the right people, every time.**
- Other costly options like Cold Calling, SEO, PPC and email marketing produce wildly mixed results with very low ROI. Whereas LinkedIn provides high quality, **predictable leads** that are hand targeted by you, so require little qualification.

High Readership rates

Because Business People use LinkedIn to generate their own sales leads, **they do not simply spam out your message** without properly reading it first.

STATS **90% of LinkedIn users think the site is useful.**
Specifically because...

- “It helps me to connect to individuals in my industry as possible clients”
- “It is more professional than Facebook”
- “It allows me to hire people that I wouldn’t regularly meet”

Bypass Spam Filters

LinkedIn domain (www.linkedin.com) is on most people’s e-mail “White List” therefore your precious business pitch lands directly in their mailbox which they check everyday and where it is read.

Organic Growth - Reach inaccessible people

Your network is custom built by hand - unlike any other type of campaign, your network grows organically, as we open up your network, more and more contacts become available to you.

Busy people use LinkedIn for business

LinkedIn vs. Twitter or Facebook strategy ~ Facebook and Twitter are good for small businesses, to increase a little awareness about your company by making a company facebook page but when was the last time you heard of a senior decision maker with the time to hang around posting on Twitter or Facebook all day - NEVER - people of this senior caliber avoid all forms of “busy work” and focus strongly on the commercial objectives of driving their company. When you contact them on Facebook or Twitter your message may stay there for months. However, through LinkedIn your message is delivered straight to their inbox which they use everyday.

Credibility

LinkedIn is a highly respected business network that does not tolerate spam which makes your message much more credible.

More Buy in ~ Business Networking = "double opt in" status

Your message is positively received when sent to people who have **actively chosen** to become your first level contact (accepted your LinkedIn invite) and become a part of your network having received a warm personal invite followed by a tailored welcome message. A welcome message is the follow up sales message edited by you.

Build a Solid reputation

Our methods purposefully steer away from a spammy sales message. We have tried many different methods and our tried and tested tailored messages work best. We know which strategy works best when it comes to LinkedIn.

Warm up leads - Reduce cold calling with our drip feed inbound lead generation strategy

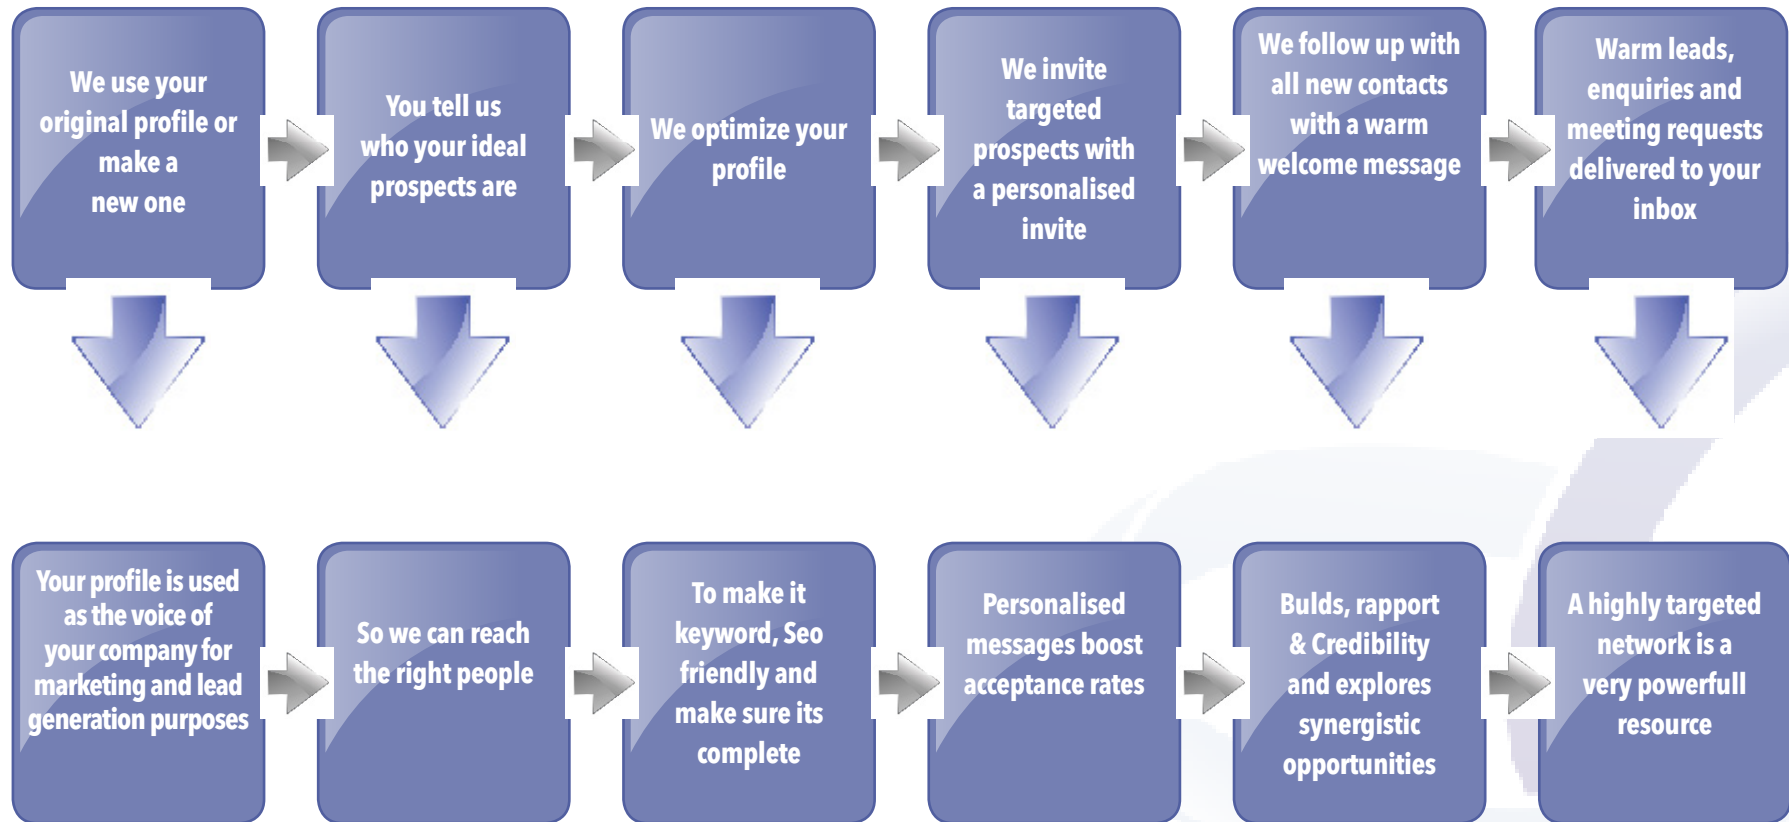

All sellers know that cold calling reduces morale, has low conversion rates and from calling 100 companies you might get 2-3 decision makers on the phone. Through our LinkedIn Lead Generation Campaigns you will be reaching the decision makers the very first time. No cold calling or selling required. Every LinkedIn invite is personalized so it doesn't look like spam or from a robot. All the followup sales messages are personalized as well. Your leads are warmest when your ideal prospects have viewed your LinkedIn profile, company website and chose to accept you in their network. This is when you can pitch your services, tell them "whats in it for them" and what you have to offer.

We avoid a spammy sales approach that “tunes out” your reader.
